SEO Basics, Web Analytics,
Copywriting Basics, UI
Implementation, Figma

Languages

- English — B1
- Russian — Native
- Turkish — A2

Irina Leonova

Frontend Developer (React / JavaScript)

I build fast, structured, and conversion-focused interfaces that help businesses present their products clearly and turn visitors into customers.

My background combines frontend development with several years of hands-on experience in paid advertising and lead generation. Before moving into development, I worked with traffic, landing pages, and conversion analysis, which gave me a deep understanding of how users actually interact with websites and what influences their decisions.

Employment History

Freelance / Website Development

Dec 2025 — present

- Developed landing pages and websites for clients
- Worked with UI implementation and responsive layouts
